(57) Abstract :

The financial sector, led by financial technology (fintech) companies, has been rapidly increasing the use of AI/ML systems (Box 1). Recent adoption by the financial sector of technological advances, such as big data and cloud computing, coupled with the expansion of the digital economy, made the effective deployment of AI/ML systems possible. A recent survey of financial institutions (WEF 2020) shows that 77 percent of all respondents anticipate that AI will be of high or very high overall importance to their businesses within two years. This study explores the use of artificial intelligence (AI) and machine learning (ML) in the financial sector and the resultant policy implications.1 It provides a nontechnical background on the evolution and capabilities of AI/ML systems, their deployment and use cases in the financial sector, and the new challenges they present to financial sector policymakers. Accompanied Drawing [FIG. 1] [FIG. 2]

(57) Abstract :

Abstract:- Thermal comfort is an essential factor for humans in enclosed environments such as passenger automobiles. India is a tropical country with summer temperatures ranging from 450 to 500 degrees Celsius. If a vehicle is parked in such a heated atmosphere for more than 30 minutes, the internal temperature can rise to 600 to 700 degrees Celsius. Temperature rise is affected by Sun locations such as solar azimuth angle and solar altitude angle. If the owner, passenger, or driver enters a hot vehicle, they will experience suffocation and will have no thermal comfort. It is impossible to bring the temperature down to a comfortable level in a short period of time. To manage the temperature, there are two options: turn on the air conditioner or open all windows. When we utilise the air conditioning system to adjust the temperature, it takes longer to achieve a comfortable level and puts greater strain on the engine system. When the temperature is adjusted by opening all windows, it takes longer to reach a pleasant temperature. It is dependent on the outside temperature; if the outside temperature is more than, opening the window will not allow you to attain a comfortable temperature.

(57) Abstract :

ABSTRACT COMMUNICATION EFFICIENT FEDERATED LEARNING SYSTEM WITH DATA PRIVACY AND DATA SECURITY Aspects of present disclosure the client selection module (101) using client selection federated (FedCS) techniques selects number of clients for training process. The client device (102) configured with the client selection module (101) store necessary training data locally, and the client device send non sensitive information to a central server (103). In another aspect the central server (103) is configured with the processor (104), and the processor using TensorFlow Federated module (105) and machine learning techniques (106) generate a locally trained model. The processor (104) retain the locally trained model until developing a standard trained model and deploys in end user device (107).

प्रमाणित किया जाता है कि संलग्न प्रति में वर्णित डिजाइन जो **AUGMENTED REALITY FEEDBACK ANALYSIS DEVICE** से संबंधित है, का पंजीकरण, श्रेणी 14-02 में 1.Mrs. Babita Verma 2. Mrs. Anuradha Sharma 3.Mrs. K. Subhashini Spurjeon 4.Dr. Jyothi Pillai 5.Dr. Neha Jain 6.Mousmi Ajay Chaurasia 7.Seema Verma के नाम में उपर्युक्त संख्या और तारीख में कर लिया गया है।

Certified that the design of which a copy is annexed hereto has been registered as of the number and date given above in class 14-02 in respect of the application of such design to **AUGMENTED REALITY FEEDBACK ANALYSIS DEVICE** in the name of 1.Mrs. Babita Verma 2. Mrs. Anuradha Sharma 3.Mrs. K. Subhashini Spurjeon 4.Dr. Jyothi Pillai 5.Dr. Neha Jain 6.Mousmi Ajay Chaurasia 7.Seema Verma.

डिजाइन अधिनियम, 2000 तथा डिजाइन नियम, 2001 के अधधीन प्रावधानों के अनुसरण में।
